

# OXUS CORE RETURN PROCESS

Follow the below instructions to return your old/used sieve columns from your Inogen One® G3

1. Wrap your old/used sieve columns with the provided bubble-wrap to avoid damage and place into the same brown box you received your new replacement sieve columns in. Place the blue column tool into the same brown box on top of the old/used sieve columns and close the box shut.

2. Place the brown box into the provided USPS Padded Envelope with the Return Label already included.

3. Remove the liner on the USPS Padded Envelope to expose the adhesive, and fold down to secure shut.

4. Place the USPS Padded Envelope directly into your mailbox for pickup, or scan the QR code on the Return Shipping label to request a free Package Pickup. Oxus will track your Return Core shipment and notify you once received to complete your order.

***An additional charge of \$10.00 will be made to your card in the event the old/used sieve columns are not returned within 30 days of shipment.***
